DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-7, drawn to a crusher machine, classified in class 241.

Group II. Claims 8, drawn to a process of freeing jammed material located in a crushing machine, classified in class 241.

Inventions of Group I and Group II are related as apparatus and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus of Group I as claimed can be used to practice another and materially different process and not necessarily the specific process of Group II.

For example, the crush machine of Group I can be used to crush material which is a materially different process compared to the process of freeing jammed material located in a crushing machine.

Conclusion

A telephone call was made to the attorney of record, Evan Witt, on December 22, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
